DETAILED ACTION

Response

1. This Office Action is in response to the amendment filed February 6, 2009.

Claims 27 and 95 have been amended. Claims 1-52 and 88-108 are allowed.

Allowable Subject Matter

2. Claims 1-52 and 88-108 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art does not teach the claimed invention.

The prior art used in the Non-Final Rejection mailed August 6, 2008, de Wild et al., is overcome by Applicant's arguments. Specifically, de Wild et al. does not teach the metal support structure, as Applicant points out on page 17 of the Remarks.

On page 5 of de Wild et al., copper-based catalysts are disclosed as a washcoat on aluminum substrates; however, as Applicant has indicated, these "aluminum" substrates are actually alumina substrates, as indicated in column 2 of page 5 and column 2 of page 6.

The prior art does not teach reforming of vaporous alcohol, e.g. ethanol, with a copper catalyst supported on a metal support, of a sponge or other structure. Other related prior art in addition to de Wild et al. will be discussed below.

De Graaf et al. (US 4,383,124) teach gas phase dehydrogenation of alcohols, e.g. ethanol, but the catalyst is a Cu-Mg catalyst (abstract; column 1 line 54; column 3 lines 18-22). De Graaf et al. do not teach a metal support structure of the catalyst.

Gubelmann-Bonneau (US 5,840,971) teaches dehydrogenation of gaseous ethanol, but again the catalyst is a Cu-Si catalyst, and there is no teaching of a metal support structure.

Kearl (2004/0191594) teaches steam reforming of alcohols with a copper catalyst supported on a zinc oxide, not metal, support ([0046]).

Franczyk (US 5,367,112) teaches the use of Raney copper to dehydrogenate aqueous, not gaseous, alcohol (abstract). There is no teaching or suggestion to use the same catalyst for gas phase reactions.

Shnell (US 5,911,684) teaches dehydrogenation of ethanol, but teaches a non-metal support structure of the catalyst.

Essentially, Applicant's invention as claimed is allowable over the prior art because the prior art does not teach the use of a metal-supported copper catalyst for reforming an alcohol when the alcohol is contained in a feed gas mixture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
